

Exit Alcoa highway and get in lane B. Go beside building D and C and turn right before you get to building E. Make the second right and park in parking garage under building C or D. Probably the first right under building C would be preferred. Go to the elevator under building C and go up to first floor. Take hallway between buildings C and B and A until you reach building 2. You will pass the cafeteria on your right as you enter building 2. You will pass an information desk if you go straight or if you take the right corridor. The Health Information center is between the two information desks on the next corridor that connects them. You can also be dropped off at point V and walk into the hospital and walk right past it. If they can go to <http://www.utmedicalcenter.org/Health-Information-Center.html> they can take a 360 degree tour of the health information center. When they leave they will go back to the parking garage and drive through the exit where the cost will be \$2.00. If they want something to eat they can go to the cafeteria which is on the way down the corridor near building A.
